

Once again, our County Zoning Board has not posted their notice legally for their meeting tonight and here is the proof.

On their agenda, they are by state law supposed to have the members' name, who appointed them, the start and the end of their terms.

For the Zoning Board, their terms start on the first Monday in January. It isn't when they were appointed to the board, it is the term beginning and ending date that is necessary. With this County Zoning Board, it's a toss-up as to what shows up on the agenda.

Max placed a formal complaint to the PAC on May 26th. The PAC got back with everyone on June 1st and let this board know that it had to comply or give a reason why it is just too hard to follow the law by June 30th. We haven't heard back yet from the PAC, but hopefully we will hear back from them sometime this week.

I am giving you a copy of the complaint with the legal and proper beginning and ending dates.

There is no reason for them to break the law like this and they have been breaking the law for literally for more than a decade. Anything they do tonight – even everything that they've done in the last decade – can be overturned in court because of this lawless behavior.

So, I want to explain the effect that this kind of lawlessness has on our community.

To have someone break into your home and steal your TV is bad, like really bad. But it is devastating to have an illegal County Zoning Board use County resources to steal your property rights like building on your own property, fixing your own home, or even keeping you from giving your own kids and grandkids a leg up in the world because you can't afford to give them part of your own property to live on.

So please people, get it together.
